**Accenture Delivery Metrics
(FY05):** Measures delivery
performance

The Accenture Delivery Suite

- Accenture Delivery Methods
 - Drive consistency and reduce risk using a standard approach for delivering solutions.
 - Provide a simple, yet comprehensive approach that has been proven over years of experience.

Accenture Delivery Methods Support Multiple Business and Technology Solutions

•**The Accenture Delivery Methods address an entire engagement by providing:**

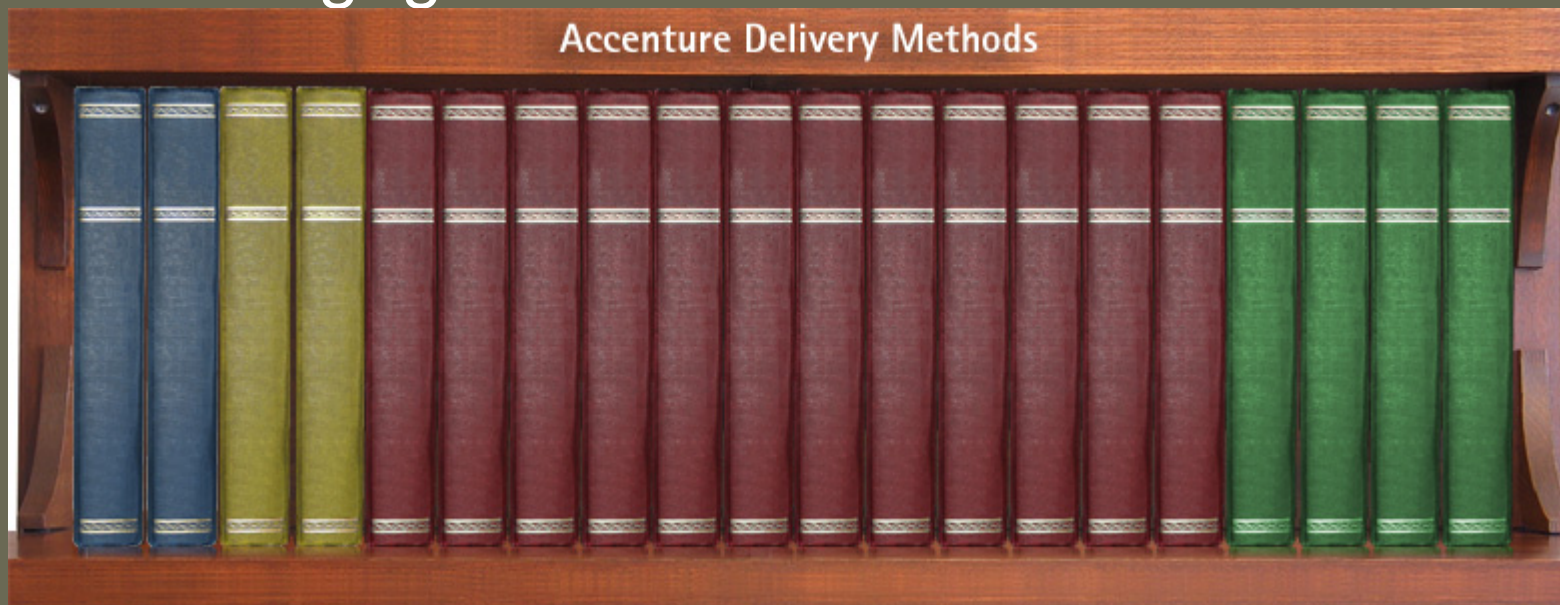

- Accenture Delivery Methods for Management:** Drive management discipline and broad-based oversight.
- Accenture Delivery Methods for Strategy & Planning:** Offer an approach for identifying value creation opportunities, formulating business strategies and planning solutions.
- Accenture Delivery Methods for Development:** Deliver solutions and all of the elements that comprise these solutions including business processes, systems and organizations.
- Accenture Delivery Methods for Operations:** Support Accenture's ongoing service delivery activities for application management, technology infrastructure and business processes.

Easy Access to All Accenture Delivery Methods

- To support the variety of work we do, Accenture has organized a methods library where each book is focused on a particular type of project.
- An engagement selects the methods that are

Why is a Methodology Important?

- Reduced cost
- Improved productivity
- Improved quality & consistency
- Predictability & timeliness
- Reduced risk
- Improved cross-group coordination
- Improved skills
- Reuse opportunities

History of Accenture Methodology

1970's

- METHOD/1 was the early version of our methodology. It has evolved to provide coverage for different types of development:

- Mainframe
- Client/server
- Packaged Solutions
- Application Management
- Web Development

1980's

- We developed the Business Integration Methodology (BIM) as a comprehensive set of methods for delivering "business capabilities"

- People, Process & Technology
- Driven by Strategy

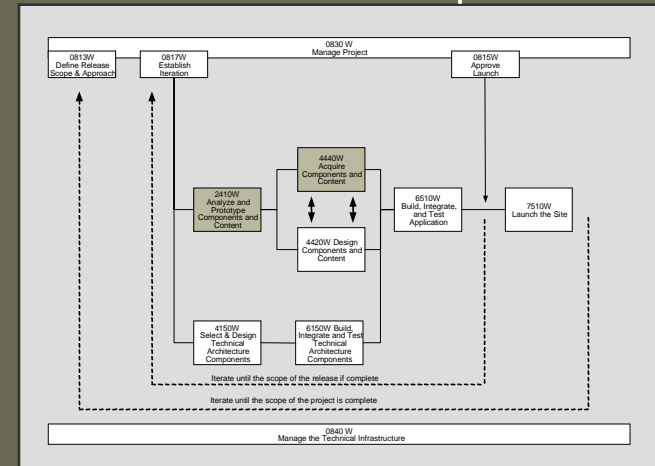

1990's

- To address the wide variety of work that we do, we developed numerous extensions to BIM.

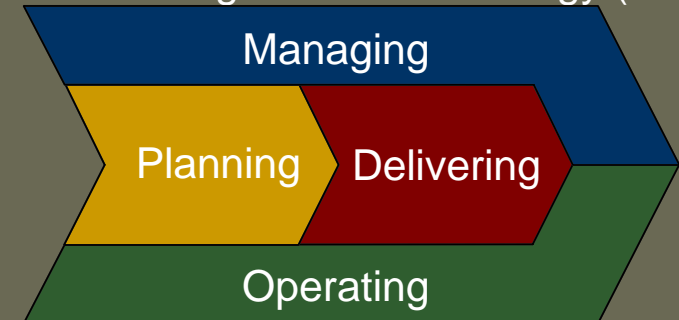

2000's

- The Accenture Delivery Methods represent the next step.

METHOD/1 Web Development Route

Business Integration Methodology (BIM)

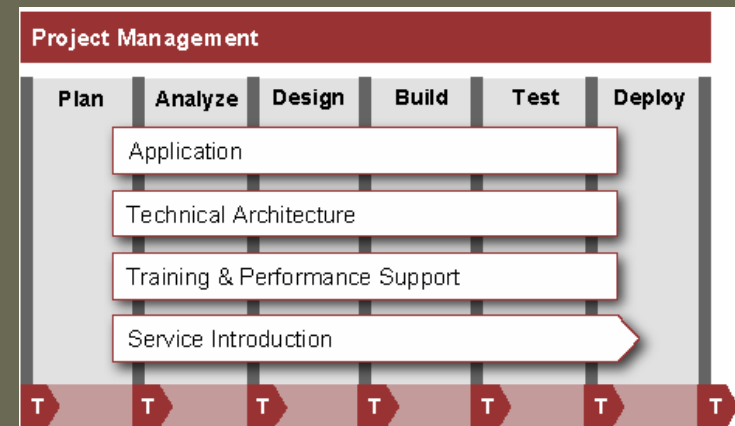

Accenture Delivery Methods for PeopleSoft

Supports global standardization of PeopleSoft implementations:

- Complete lifecycle support for plan, analyze, design, build, test and deploy
- PeopleSoft-specific deliverable templates, samples and checklists;
- PeopleSoft-specific terms, processes, tools and references applicable to external PeopleSoft knowledge assets
- Support for process and organizational elements of the solution
- Supports transition of application to operating unit
- Proven project management methods
- Support for CMMI Level 3, ISO 9000
- Support for multi-site development:
 - Transition points
 - Distributed work guidelines
 - Operating model
- Leverages Accenture Delivery Tools

Accenture Delivery Methods - Benefits

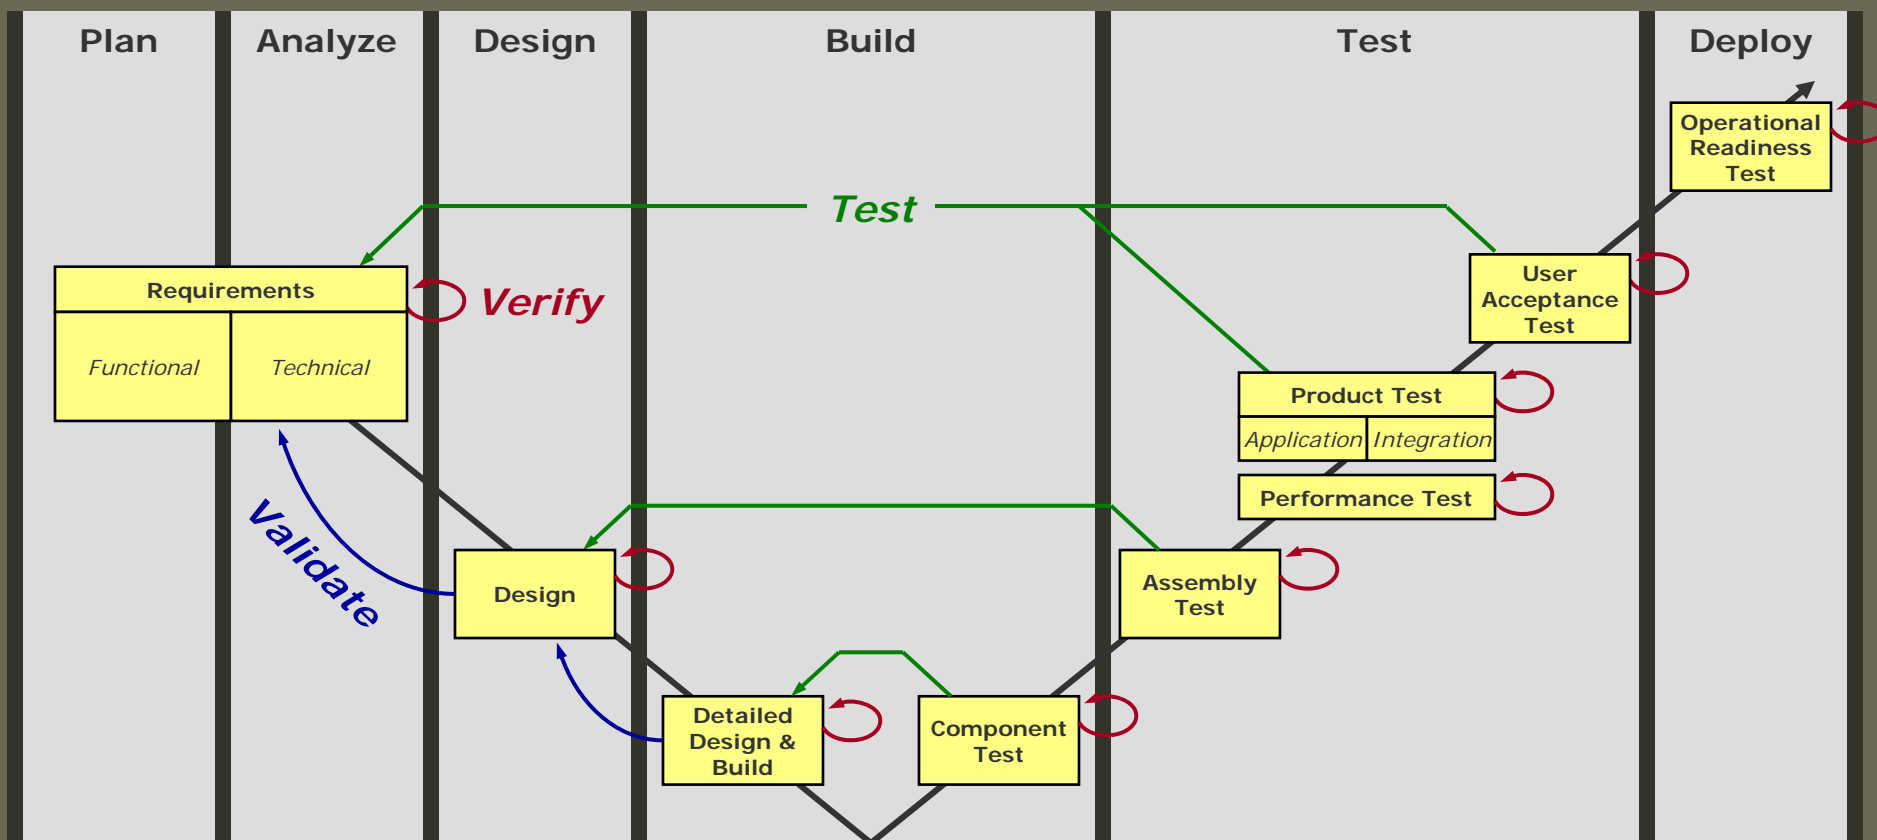

- Easy to understand:
 - Concise wording, bullet points
 - Intuitive, industry-accepted terminology
 - Mental map ⇒ easy to understand and remember
 - Standard deliverable IDs
- Different views for different roles:
 - Executives
 - Project managers
 - Practitioners
- Flexible and easy to tailor
- Aligned with value and quality objectives
- Built and tested in the field
 - Engage experts
 - Responsive to feedback
 - Harvest best practices

Accenture Delivery Methods

Deliver Quality Throughout the Project Lifecycle

- Our methods infuse quality from the beginning. The V-Model promotes stage containment through verification, validation and testing.

Accenture Delivery Methods Provide a Simple, Easy-to-use Structure
